Description	To solve code-base formate issues

Developer can perform steps before push the code to repository.

To solve the below code formate issues:

- ◆ space issues
- ◆ code not align
- ◆ block and braces in zig-zag

Step-1 : Open inteliJ IDE and click on file ------> setting -----> codeStyle -------> import xml file

Steps-2 : goto -----> schema drop-down and click import xml file.

Steps-3 : file ----->   setting ---------> keymap -----> eclipse

Steps-4 : Select code / methods /line ---------------->   ctrl + shift + f

Happy coding !!
